PROSPEX BUILT FOR THE ICE DIVER

Built for the Ice Diver - U.S. Special Edition. Designed for those who treat life as the ultimate adventure, the Seiko Prospex line meets every challenge with technological excellence and style. Part of a rich legacy of innovation in high-intensity timekeeping, Prospex continues to celebrate a long history of sports watch excellence with recreations and reinterpretations of landmark achievements. Honoring the acclaimed 2007 diver's watch, with its distinctive wide case and the thick printed bezel numerals, this reimagined Special Edition also pays tribute to the durability of Seiko watches in the coldest conditions, with colors suggesting light reflected on ice. Trusted equipment for the Japanese Antarctic Research Expedition (JARE) and on Mt. Everest climbs, Seiko sport watches have forged a deep connection between the company and those who rely on superior timekeeping in the most demanding environments, from frozen peaks to the watery depths explored by ocean conservationists. The deeply patterned gray dial, featuring a magnified date window and LumiBrite hands and markers, is topped by a scratch-resistant sapphire crystal. A 24-jewel automatic movement beats at a frequency of 21,600 vibrations per hour, with a power reserve of approximately 70 hours, and can be wound manually or automatically. Following ISO standards for scuba diving to depths of up to 200 meters, this exceptional watch is crafted of stainless steel, with gray one-way rotating elapsed timing bezel, screwdown crown and caseback, and tri-fold push button release clasp with secure lock and extender. 200m Water Resistant

FEATURES

Built for the Ice Diver

U.S. Special Edition

Automatic with manual winding capability

Patterned gray dial inspired by glacial ice

Gray one-way rotating elapsed timing bezel

Magnified date window

Screwdown crown

LumiBrite hands and markers

Tri-fold clasp with push button release

TECHNICAL DATA

CASE DIMENSIONS:

Thickness: 12.9mm

Diameter: 45mm

Length: 52.6mm

CASE: Stainless steel case

CRYSTAL MATERIAL: Sapphire crystal

DIAL COLOR: Gray

STRAP: Stainless steel bracelet

MOVEMENT:

Caliber 6R35

21,600 vibrations per hour

24 jewels

Power reserve: approximately 70 hours

WATER RESISTANCE: 200 meters (660 feet), follows ISO standards and is suitable for scuba diving
