PROSPEX SPEEDTIMER MECHANICAL CHRONOGRAPH LIMITED EDITION

Available November 2021

Prospex Speedtimer Limited Edition Mechanical Chronograph. Designed for those who treat life as the ultimate adventure, the Seiko Prospex line meets every challenge with technological excellence and style. Available only in a limited edition of 1,000, with the serial number engraved on each caseback to show its position in a controlled production run, this exceptional watch celebrates Seiko's first precision chronographs, developed for international sporting competitions in 1964, as well as its 1969 introduction of the world's first automatic chronograph. Providing chronograph measurement of up to 30 minutes of elapsed time in 1/8-second increments, the 34-jewel automatic movement, visible through the screwdown see-through caseback, beats at a frequency of 28,800 vibrations per hour, with a power reserve of approximately 45 hours and manual winding capability. The proprietary 8R46 movement includes a column wheel and vertical clutch mechanism allowing for smooth, stutter-free movement of the chronograph hand while providing longer wear and efficiency, and maintaining the power reserve better during chronograph operation. Crafted of stainless steel with super-hard coating and tri-fold push button release clasp, this extraordinary timepiece also features a clean white dial with hairline finish and LumiBrite hands and markers, topped by a dual curved anti-reflective sapphire crystal. An additional black leather strap is included in the special collectors' box. 10 bar, 100M Water Resistant

FEATURES

Prospex Speedtimer Limited Edition Mechanical Chronograph

Available only in a limited edition of 1,000, with the serial number engraved on each caseback to show its position in a controlled production run

Celebrates Seiko's first precision chronographs, developed for international sporting competitions in 1964, as well as its 1969 introduction of the world's first automatic chronograph

Automatic with manual winding capability

Chronograph measurement of up to 30 minutes of elapsed time in 1/8-second increments

TECHNICAL DATA

CASE DIMENSIONS:

Diameter: 42.5mm

CASE: Stainless steel case with super-hard coating
